#### **Course Objectives (Copy and paste the table from courses specification)**

#### **1.** Course Description

This course is intended to help the students to gain the basic knowledge about chromosome structure, organization and function. The course discusses the patterns of inheritance and explains the types of mutations and their effect. The course illustrates clinical features of common chromosomal abnormalities and describes cytogenetic diagnostic techniques and their applications to genetic disorders. The course focuses on how constitutional and acquired genetic alterations can lead to the development of malignant neoplasms and the course also, summarize conventional approaches for treatment of genetic diseases and the general status of gene-based therapies

#### 2. Course Main Objectives

- 1. Recall sufficient knowledge about gene structure, organization, function, control and segregation.
- 2. Explain patterns of inheritance and characteristics of autosomal dominant, autosomal recessive, X-linked dominant and X-linked recessive traits.
- 3. Recognize the types of mutations and their contribution to human variation and disease.
- 4. Outline the clinical features of common numerical, structural, and mosaic chromosomal abnormalities.
- 5. State common molecular and cytogenetic diagnostic techniques and their applications to genetic disorders.
- 6. Explain how constitutional and acquired genetic alterations can lead to the development of malignant neoplasms and how identification of these changes can be used in the diagnosis, management and prevention of malignancy.
- 7. Compare the alternative approaches and goals of different screening programs for genetic diseases in newborn infants, pregnant women, and adults, including their ethical issues.
- 8. Summarize conventional approaches for treatment of genetic diseases and the general status of gene-based therapies.
- 9. Recognize how DNA and RNA are extracted and subsequent usage in downstream techniques.

#### **Course Learning Outcomes (Copy and paste the table from courses specification)**

	CLOs	Aligned PLOs
1	Knowledge and Understanding	
1.1	Describe the structure of gene and chromosome, and their biological functions, in health and disease	<b>K</b> 1

#### Course name (Course code) STUDY GUIDE

2	Skills:	
2.1	Interpret the results of clinical, laboratory, and radiological findings for proper	<b>S</b> 1
2.1	problem solving and decision making	
2.2	Interpret DNA, RNA and protein analytical techniques for genetic diseases in	S2
	newborn infants, pregnant women, and adults, including their ethical issues	
2.3	Communicate effectively with peers and instructors	S6
3	Values:	
3.1	Demonstrate ethical attitude with colleagues and facilitators	V1
3.2	Operate self-learning from updated medical information from different approved	V2
	sources in the web.	
3.3	Demonstrate the capacity for self-reflection and personal development	V2

### Assessment of Student in PBL MBBS 4<sup>rd</sup> Year 1443/1444

Facilitator's name: Group number: .....

Module: Medical genetics

The assessment items are grouped under two main headings (Total marks to give for each case = 6 marks)

#### A. Learning and cognitive skills:

No	Ability of the student to	Marks	Marks Obtained
1.	Attend to PBL session on time	1	
2.	Take active roles such as scribing/ becoming a leader	1	
3.	Identify New/difficult words in the case	1	
4.	Participate effectively during the session (Sharing appropriate ideas and information)	1	
5.	Interpret the case and the related findings	1	
6.	Generate learning issues	1	
	Total marks for Session 1	6	

#### **B.** Interaction and participation to group function:

No	Ability of the student to	Marks	Marks Obtained
1.	Build discussion and Maintain good group dynamics	1	
2.	Present his/her learning issue effectively	1	
3.	Prepare well with all the identified learning issues	1	
4.	Manage presentation time well	1	

Course name (Course code) STUDY GUIDE

المملكة العربية السعودية وزارة التعليم جامعة الحدود الشمالية كلية الطب قسم الكيمياء الحيوية

	<b>Total marks for Session 2</b>	6	
6.	Ask and answer questions relevant to the topic	1	
5.	Communicate effectively and discuss collaboratively with other members	1
